Things to Consider when choosing priority areas:

- What is the communities' current needs?

- Where are there gaps in services and resources within the tri county area?

- Is the priority inclusive of Benton, Lincoln, and Linn communities?

- Will the pilots who just received funding address these gaps?

- Is the priority aligned with IHN-CCO goals and objectives for members?

- Is the priority aligned with the Community Advisory Council (CAC), its Community Health Improvement Plan (CHIP), and the State Health Improvement Plan (SHIP) priority areas?
